

We take about **2-7 business days** to create apparel products (t-shirts etc.) and **2-5 business days** for non-apparel (posters etc.) products. Then you should **add shipping times on top of that**. Speed and price depends on product type and destination. It can get a bit confusing, that's why we've made these tables to help you out.

97.66% of our orders are shipped within 5 business days. More than a half of our orders are shipped within 3 business days or less.

Flat rates vs. live rates

Flat rates are the default pricing for shipping. The type of shipping method used depends on the availability and price offered by the carrier. Live rates, however, are calculated based on the exact weight and destination of the order. They're also the only shipping method that offers express options, like FedEx Standard Overnight or FedEx international rates. Live rates are often cheaper than the flat rates, especially for international orders.

Some products might be shipped separately

Each item we ship may have different delivery times. This is because some products are packaged and shipped separately.

For example, we send our posters in super-durable tubes. Obviously, a canvas won't fit in there.

Shipping prices are cumulative. When you're calculating shipping prices on your end, make sure to add up the different shipping prices for all of the products you're sending.

For example, you can order a t-shirt with a flat rate shipping price of \$5.00. Each additional t-shirt adds \$0.75 for shipping. If you add a tote to the order, then it will also cost simply an additional \$0.75.

However, if you choose another product, like a mug (that requires different packaging), then you'll have to add the full shipping price. In this case, it would be an additional \$6.95.
